From the surge of ebooks to the self-publishing explosion and the growing popularity of audiobooks, Book Wars provides a comprehensive and fine-grained account of technological disruption in one of our most important and successful creative industries. Like other sectors, publishing has been thrown into disarray by the digital revolution. The foundation on which this industry had been based for 500 years – the packaging and sale of words and images in the form of printed books – was called into question by a technological revolution that enabled symbolic content to be stored, manipulated and transmitted quickly and cheaply. Publishers and retailers found themselves facing a proliferation of new players who were offering new products and services and challenging some of their most deeply held principles and beliefs. The old industry was suddenly thrust into the limelight as bitter conflicts erupted between publishers and new entrants, including powerful new tech giants who saw the world in very different ways. The book wars had begun. While ebooks were at the heart of many of these conflicts, Thompson argues that the most fundamental consequences lie elsewhere. The print-on-paper book has proven to be a remarkably resilient cultural form, but the digital revolution has transformed the industry in other ways, spawning new players which now wield unprecedented power and giving rise to an array of new publishing forms. Most important of all, it has transformed the broader information and communication environment, creating new challenges and new opportunities for publishers as they seek to redefine their role in the digital age. This unrivalled account of the book publishing industry as it faces its greatest challenge since Gutenberg will be essential reading for anyone interested in books and their future.The march of the Android-based tablets has begun, including Galaxy Samsung Tab, Motorola XOOM, Nook and more. Meanwhile, employment prospects for high school and college graduates are fading, and the public is losing faith in its schools. The education paradigm inherited from the Industrial Era is in crisis. In the last decade, however, the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone. What will our educational institutions make of this unprecedented flood of Web-based learning resources? How can schools be transformed to accommodate the new possibilities for personal and social learning? Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book. Drawing on new organizational models grounded in complexity theory, Waks maps out an inspiring new paradigm for education in the Internet age, and connects all the dots in constructing detailed models for new schools now transformed into "open learning centers." Finally, Waks details action steps readers can take to speed this transformative process along in their own school locations.We live in the age of cell phones, iPads and netbooks, where gadgets are everywhere, and many people use one at nearly every waking moment. The newest gadgets don't often come cheap, and a poor investment can be costly for an institution like a library.In this issue of Library Technology Reports, eminent blogger and library technology expert Jason Griffey provides a comprehensive guide to the present and future of modern gadgets, and how they can fit in to any librarian's plan for a high-tech future. From e-readers to cameras and audio recorders to the iPad, Jason provides insight into what these devices can do, how much they cost, and how librarians can use them to enhance their facilities and service."With an emphasis on global advantage, the text offers a comprehensive examination of regional and international issues to provide a complete, accurate and up-to-date explanation of the strategic management process. New coverage on environmental concerns and emerging technologies as well as examples and cases from Australia, New Zealand and Asia-Pacific serve to engage students while updated international content demonstrates how strategic management is used in the global economy. The text takes a 'resource-based' approach, which requires the examining of a firm's unique bundling of its internal resources." --Publisher's website.This book constitutes revised selected papers from the 15th Workshop on e-Business, WeB 2016, held in conjunction with the International Conference on Information Systems, ICIS, in Dublin, Ireland, in December 2016. An electronic book (also e-book, ebook, electronic book, digital book) is a book-length publication in digital form, consisting of text, images, or both, and produced on, published through, and readable on computers or other electronic devices. An e-book can be purchased/borrowed, downloaded, and used immediately, whereas when one buys or borrows a book, one must go to a bookshop, a home library, or public library during limited hours, or wait for a delivery. Electronic publishing or ePublishing includes the digital publication of e-books and electronic articles, and the development of digital libraries and catalogues. EPUB (short for electronic publication; alternatively capitalized as ePub, ePUB, EPub, or epub, with "EPUB" preferred by the vendor) is a free and open e-book standard by the International Digital

Publishing Forum (IDPF). Self-publishing is the publication of any book or other media by the author of the work, without the involvement of an established third-party publisher. One of the greatest benefits brought about by ebooks software is the ability for anyone to create professional ebooks without having to fork out thousands of dollars to design and publish a book. People can easily become authors overnight and earn income from selling online ebooks.This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.
