*Jan 13, 2021 · In chemistry, the theoretical yield is the maximum amount of product a chemical reaction could create based on chemical equations. In reality, most reactions are not perfectly efficient. If you perform the experiment, you'll end up with a smaller amount, the actual yield. To express the efficiency of a reaction, you can calculate the percent yield using this formula: ...*

*Faraday's – First Law of Electrolysis. It is one of the primary laws of electrolysis. It states, during electrolysis, the amount of chemical reaction which occurs at any electrode under the influence of electrical energy is proportional to the quantity of electricity passed through the electrolyte.*

*Chemical Stoichiometry refers to the quantitative study of the reactants and products involved in a chemical reaction. The word “stoichiometry” is derived from the Greek word “stoikhein” meaning element and “metron” meaning measure.. The term Stoichiometry was first coined or discovered by a German chemist named Jeremias Richter. Even though this tongue-twisting ...*
