The Sky's the Limit "That Girl From the Dummy Line" is a first person account of growing up in severe poverty in the delta farm region of northeastern Arkansas in 50s and 60s in a tar-papered shack built on a dirt road known as the dummy line. The dummy line girl was the third of ten children born to an illiterate farmer and his wife, who didn't understand their daughter's love of education or her desire to go to college as she excelled in school. Indeed, they actively attempted to prevent her from leaving home to seek a college degree. The dummy line girl spent much of her childhood working in the cotton fields. Farm work and other chores took a toll on the dummy line girl's ability to stay on track with her studies and goals. Further complicating her life was a dysfunctional relationship with her parents and an abusive older sister. The local public school system became her refuge and provided her with the hope she needed in order to plan a better future for herself. This is a story about a girl who refused to accept the path given her by accident of birth - a girl who wanted more and believed she deserved more and was willing to work for it.

Everything, Everything Girls Think of Everything

Women of Invention "This behind-the-scenes look at the first Apollo moon landing has the feel of a public television documentary in its breadth and detail" (Publishers Weekly, starred review). Here is a rare perspective on a story we only thought we knew. For Apollo 11, the first moon landing, is a story that belongs to many, not just the few and famous. It belongs to the seamstress who put together twenty-two layers of fabric for each space suit. To the engineers who created a special heat shield to protect the capsule during its fiery reentry. It belongs to the flight directors, camera designers, software experts, suit testers, telescope crew, aerospace technicians, photo developers, engineers, and navigators. Gathering direct quotes from some of these folks who worked behind the scenes, Catherine Thimmesh reveals their very human worries and concerns. Culling NASA transcripts, national archives, and stunning NASA photos from Apollo 11, she captures not only the sheer magnitude of this feat but also the dedication, ingenuity, and perseverance of the greatest team ever—the team that worked to first put man on that great gray rock in the sky. Winner of the Robert F. Sibert Informational Book Award "An edge-of-your-seat adventure . . . Lavishly illustrated . . . This exhilarating book . . . will captivate." —Chicago Sun-Times "Thimmesh gives names and voices to the army that got Neil Armstrong and company to the moon and back. The result is a spectacular and highly original addition to the literature of space exploration." —The Horn Book "This beautiful and well-documented tribute will introduce a new generation to that triumphant time." —Kirkus Reviews (starred review)

Great Books for Girls At just twenty-two years of age, Briana Mills finds herself at a desperate crossroads. Once a promising student at the University of Oregon, she now finds herself alone on the streets of Portland with only the clothes on her back, memories of a happier time, and the stray dog that's adopted her. And she's got the drug that helps her forget. Briana's mistakes haunt her, lashing her with severe consequence, forcing her to make a decision few would ever make. Still, in a final attempt to make her young life count for something, Briana begins writing it all down—everything—so that others walking the crumbling precipice of rebellion might leap to safety before it's too late. She writes about her present struggles and the past. She writes about Michael, the boy she loved and left behind when she went off to college. She writes about the violent activism and drug that derailed her life. She writes about the demands placed on her by a socially conscious mother, and the adoration shown by a proud father. And Briana talks about Brody—the young activist leader who captured her heart, took it to the altar, and then crushed it. What develops is an engrossing record of a young and troubled life, one both beautiful and ugly, innocent and corrupt, lost and then found. And wrapped in its literary sinew is a cast of characters as diverse and engaging as the stars, and an impassioned love story sure to transcend time. What readers are saying: "Timeless...provocative." "Characters so real you'd swear this was a true account." "A brilliant read!" Alone Among People is D. M. Anthony's first novel. He lives in California where he's at work on his next book. This review is from: Alone Among People (Paperback) A Compelling and Heart Warming Story, September 25, 2012 "Alone Among People is at once an engaging, moving story and a provocative statement about the thin line between thriving and sinking into an abyss as inescapable as quicksand. Its timeless and uplifting messages of hope conquering despair, healing borne of love and care, and peace at discovering one's identity are an inspiration. The author's empathy for the characters and their plight betrays knowledge of what he writes, and offers the reader a unique glimpse into a vulnerable and intimate place... his heart. I recommend this book to anyone who has traveled through the anguish of darkness and longed for the light; it may just guide your way."

Shattered Perceptions Hypatia was a Greek mathematician, astronomer, and philosopher who invented the hydrometer in about 400 AD. Described as a charismatic teacher, she was seen as an evil symbol of the pagan science of learning and she was eventually murdered by Christian zealots. For many women in years gone by, the invention process was fraught with danger and difficulty. Not only did they face the hardship and obstacles of inventing, they also had to contend with the sexism and gender discrimination of a male world that believed women had nothing to contribute. Scientific women came to the fore with momentous innovations which were impossible for men to ignore. During World War Two, Austrian actress Hedy Lamarr became a pioneer in wireless communications, developing a "Secret Communications System." More recently, 20-year-old Ann Makosinski has invented the ingenious Hollow Flashlight which converts radiant body heat into electricity. Meanwhile other women continued inventing in the domestic sphere with Miracle Mops, long-lasting lipsticks, and magic knickers. In every walk of twenty-first century life women have been challenging themselves (and men) to shape the way we live. Some of the incredible innovators featured include Myra Juliet Farrell, Sally Fox, Rosalind Franklin, Helen Murray, Anna Pavlova, Maria Telkes, Giuliana Tesoro, Haldis Aalvik Thune, Ann Tsukamoto, Margaret A. Wilcox, Ada Lovelace, and many more. The 150 remarkable women in this book show all too clearly that not only can invention no longer be described as a male dominated domain but that a woman's inspiration and ingenuity will probably be leading the life-changing ideas of tomorrow's world.

That Girl from the Dummy Line Sometimes, the things that a child hears about himself or herself is confusing to him or her. That is the case with the young boy in Almond Eyes. As a young child, he is constantly told that he has "beautiful Almond Eyes". He doesn't understand what this means until he asks his mother. She explains that his eyes are shaped like almonds because he is Korean. The boy then notices the different eye shapes of all of his friends. This is a wonderful book about celebrating the differences among friends.

Some Writer! Essential reading for our times, as women are pulling together to demand their rights—A landmark portrait of women, men, and power in a transformed world. "Anchored by data and aromatized by anecdotes, [Rosin] concludes that women are gaining the upper hand." —The Washington Post Men have been the dominant sex since, well, the dawn of mankind. But Hanna Rosin was the first to notice that this long-held truth is, astonishingly, no longer true. Today, by almost every measure, women are no longer gaining on men: They have pulled decisively ahead. And "the end of men"—the title of Rosin's Atlantic cover story on the subject—has entered the lexicon as dramatically as Betty Friedan's "feminine mystique," Simone de Beauvoir's "second sex," Susan Faludi's "backlash," and Naomi Wolf's "beauty myth" once did. In this landmark book, Rosin reveals how our current state of affairs is radically shifting the power dynamics between men and women at every level of society, with profound implications for marriage, sex, children, work, and more. With wide-ranging curiosity and insight unhampered by assumptions or ideology, Rosin shows how the radically different ways men and women today earn, learn, spend, couple up—even kill—has turned the big picture upside down. And in *The End of Men* she helps us see how, regardless of gender, we can adapt to the new reality and channel it for a better future.

Curious Jane This award-winning book is filled with odes to women inventors and Thimmesh's collage art illustrations.

Think of Everything An inspiring famous women book for girls, *Girls Who Looked Under Rocks* also makes the perfect feminist gift for girls. *Girls Who Looked Under Rocks: The Lives of Six Pioneering Naturalists* is for a world no longer confined by gender stereotypes, and a place where science is for girls, too! Parents and children will love this portrayal of six women who grew up playing in the dirt and went on to become award-winning scientists and writers. All of these women were discouraged from pursuing careers in science, but they all persisted in their passion. If there is a pre-teen or adolescent in your life, especially a girl, take a look at this empowering, inspiring chapter book. It portrays the youths and careers of six remarkable women whose curiosity about nature fueled a passion to steadfastly overcome obstacles to careers in traditionally men-only occupations. The six—Maria Merian (b.1647), Anna Comstock (b.1854), Frances Hamerstrom (b.1907), Rachel Carson (b.1907), Miriam Rothschild (b.1908), and Jane Goodall (b.1934)—all became renowned scientists, artists and writers. A wonderful resource for young researchers and biographers, these stories can be a starting point for issues of gender, science, and the environment.

At seventeen she's already lost more than most people do in a lifetime. But she's learned how to forget. The broken glass washes away the sorrow until there is nothing but calm. You don't have to think about your father and the river. Your best friend, who is gone forever. Or your mother, who has nothing left to give you. Every new scar hardens Charlie's heart just a little more, yet it still hurts so much. It hurts enough to not care anymore, which is sometimes what has to happen before you can find your way back from the edge. A deeply moving portrait of a girl in a world that owes her nothing, and has taken so much, and the journey she undergoes to put herself back together. Little Feminist Icons Coloring Book "Because the democratic process operates apart from the Church, it possesses no corrective against corrupted human nature beyond its own equally corrupt judiciary, which ends by judging not only points of law but morality itself." "There is no mention of the family in the U.S. Constitution, nor in any others patterned on its principles, and that in itself is ominous. With the onset of democracy, the family's juridical standing disappeared, along with that of God and His Church. Nor is there any mention of marriage, upon which the family rests as a social institution above all others. From the moment all men were declared equal, the family was legally replaced by the individual as basic cell and archetype of society. In other words, family rights simply disappeared into 'the Rights of Man.'" In a radio broadcast in 1949 Pius XII said, "Counterfeiting God's designs in social matters has taken place at the very root, by deforming the divine image in man. For his true figure as a creature with an origin and destiny in God, has been substituted the false portrait of a man autonomous in conscience, uncontrolled master of himself, irresponsible towards his neighbor and the social group, with no destiny beyond the earth, with no purpose beyond enjoying finite goods, with no law beyond the 'fait accompli' and the undisciplined satisfaction of his desires." In addition to the previously mentioned topics, Hertz also addresses the clashes between science and faith, the Secret of La Salette, papal politics, and the apocalyptic "abomination of desolation." Whether you agree with her or not, Solange Hertz causes us to reconsider basic assumptions of the Brave New World that we live in; assumptions we might otherwise

Girls Think of Everything My Overdue Book: Too many stories not to tell: spells out the varied episodes in the life of a man who spent decades working in Hollywood. He began as a little boy in Cincinnati impressed early on by the broadcasting magic of radio and then TV in the middle of twentieth century America. His drive to get into broadcasting culminates in an early success that gets interrupted by an unexpected sidebar in The US Army and a subsequent tour as an Infantryman in Vietnam in the late 1960's. His yearlong excursion in "Fun City East," with its repeated life and death experiences, had lifelong effects on this soldier-of-media. Following his wanderings through the jungles of Vietnam, Bright's interactions with many of America's top public figures throughout his decades in radio and television come to life with intriguing stories that are personal, professional, positive and negative. It's life without a filter! Readers across generations will share and co-experience numerous real life feelings and emotions with writer Bright as his winding trail of life opens in front of them. book endorsement for peter bright: i always thought that peter bright and i had many things in common; we both grew up in ohio, we both had careers in the live event and variety side of television, and the few times we had times to talk i thought we shared a mutual philosophy toward the ups and downs of life, but it wasn't until i read his "overdue" book that i realized just what a rich and storied life peter has had and how much more deeply he had experienced the highs and lows, particularly during his years in the military, than i ever could have imagined. it really amazes me just how little we know about people we think we know, and just how much more we appreciate who they are when we are fortunate enough to have that background filled in by someone as articulate and able to express both facts and feelings as peter has in this book. when i started to read it, i thought all of those common events that we shared would be an interesting parallel track to my life and as such i would have a great frame of reference, but as i read on, i realized just what an amazing story peter has to tell and just how well he tells it. ken ehrlich, executive producer, the grammy awards
