[Switch Security: Management and Implementation \(2.2\)](#)

Feb 10, 2020 - So let's look at the two modes of system tuning. Static Tuning . In this tuning method, the tuned daemon applies system settings when the service starts or upon selection of a new tuning profile. It configures predefined kernel parameters in profiles that tuned applies at runtime. The kernel parameters are set for overall performance expectations, and are not ...

Nov 17, 2020 - Enabling a switch interface to be a routed interface instead of a switched interface is simple: just use the no switchport subcommand on the physical interface. Cisco switches capable of being a Layer 3 switch use a default of the switchport command to each switch physical interface. Think about the word switchport for a moment. With that term, Cisco tells the switch ...

Nov 17, 2020 - Switch Security: Management and Implementation (2.2) When you take a new switch out of the box, the first thing the network engineer does is secure the switch and assign it an IP address, subnet mask, and default gateway so the switch can be managed from a remote location. Learning the different methods used to secure a switch is important.

Sep 16, 2008 . Stack master and switch priority conflicts are resolved in this order: 1. The switch that is already master remains unchanged. 2. The switch (or stack) whose master has a higher user-configured priority. 3. The switch (or stack) that is not using the default configuration. 4. The switch (or stack) with the more recent license or image version. 5.

The idea there is ?? and in fact, I do demonstrations like this when I do a live class ?? is if you overrun or exceed the ability of the switch to learn more MAC addresses, you essentially turn it into a hub. Take a nice expensive switch and tell it, "Hey, just send everything out of every port." which can be a security risk. Mark Jacob

Interactive practice questions designed to cover the legacy Cisco CCNA Route/Switch exams: 100-105 CCENT/ICND1 v3.0 and 200-105 ICND2 v3.0. There are 4 different modes to choose from: Learning, Quiz, Review, and Mock Exam.

[David Bombal](#)

Cisco's access layer switches used to be all separate physical switches where we use Ethernet cables for connectivity between the switches. Cisco Stackwise changed this, it allows us to turn multiple physical switches into a single logical switch.. Switches that support Stackwise use a special stacking cable to connect the switches to each other.
