THE MOUSETRAP, the longest-running play in the history of London's West End, begins its 60th Year run on 25 November 2011. This new edition of eight works show how Agatha Christie's plays are as compulsive as her novels, their colourful characters and ingenious plots providing yet more evidence of her mastery of the detective thriller. *THE MOUSETRAP: Cut off by snowdrifts*, the owners of a new guest house encounter terror when one of their first visitors turns out to be a homicidal maniac *AND THEN THERE WERE NONE: Ten guilty people are lured to an island mansion where an unknown killer begins to exact revenge* *APPOINTMENT WITH DEATH: The suffocating heat of an exotic Middle-Eastern setting provides a backdrop for murder* *THE HOLLOW: Beneath their respectable surface, a set of friends realise that any one of them could be a murderer* *WITNESS FOR THE PROSECUTION: A scheming wife testifies against her husband in a shocking murder trial* *TOWARDS ZERO: A psychopathic killer stalks unsuspecting victims in a seaside house perched high on a cliff* *VERDICT: Passion and love are the deadly ingredients in this thriller in which a murder causes an unexpected chain of events* *GO BACK FOR MURDER: A young woman discovers that her late mother was imprisoned for murdering her father and is determined to prove her innocence*

The Great Mouse Plot

Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in The Carbon Trap, the first book in The Carbon Series. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon

taxes, draconian regulations, and it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.

In 1996 Darwin's Black Box thrust Lehigh University biochemist Michael Behe into the national spotlight. The book, and his subsequent two, sparked a firestorm of criticism, and his responses appeared in everything from the New York Times to science blogs and the journal Science. His replies, along with a handful of brand-new essays, are now collected in A Mousetrap for Darwin. In engaging his critics, Behe extends his argument that much recent evidence, from the study of evolving microbes to mutations in dogs and polar bears, shows that blind evolution cannot build the complex machinery essential to life. Rather, evolution works principally by breaking things for short-term benefit. It can't construct anything fundamentally new. What can? Behe's money is on intelligent design.

Mr. Pérez, the Mouse

Memoir for Mrs. Sullavan

The Sacred is the Profane collects nine essays by William Arnal and Russell McCutcheon that advance current scholarly debates on secularism-debates. The essays return, again and again, to the question of what "religion"—word and concept—accomplishes, now, for those who employ it, whether at the popular, political, or scholarly level. The focus here is on the efficacy, costs, and the tactical work carried out by dividing the world between religious and political, church and state, sacred and profane.

The Sacred Is the Profane

Filled with plans for boats and cars and construction tips. 9-12 yrs.

The Chapo Guide to Revolution

If you love animals, this is a book for you- whether you are 6 or 16 or 60 and above. This is for people who are young at heart and love life - every little bit of it.

Mouse Trap

Iconic actress Hayley Mills shares personal memories from her storied childhood, growing up in a famous acting family and becoming a Disney child star, trying to grow up in a world that wanted her to stay forever young. The daughter of acclaimed British actor Sir John Mills was still a preteen when she began her acting career and was quickly thrust into the spotlight. Under the wing of Walt Disney himself, Hayley Mills was transformed into one of the biggest child starlets of the 1960s through her iconic roles in Pollyanna, The Parent Trap, and many more. She became one of only twelve actors in history to be bestowed with the Academy Juvenile Award, presented at the Oscars by its first recipient, Shirley Temple, and went on to win a number of awards including a Golden Globe, multiple BAFTAs, and a Disney Legacy Award. Now, in her charming and forthright memoir, she provides a unique window into when Hollywood was still 'Tinseltown' and the great Walt Disney was at his zenith, ruling over what was (at least in his own head) still a family business. This behind-the-scenes look at the drama of having a sky-rocketing career as a young teen in an esteemed acting family will offer both her childhood impressions of the wild and glamorous world she was swept into, and the wisdom and broader knowledge that time has given her. Hayley will delve intimately into her relationship with Walt Disney, as well as the emotional challenges of being bound to a wholesome, youthful public image as she grew into her later teen years, and how that impacted her and her choices--including marrying a producer over 30 years her senior when she was 20! With her regrets, her joys, her difficulties, and her triumphs, this is a compelling read for any fan of classic Disney films and an inside look at a piece of real Hollywood history.

Forever Young

Honeymoon with My Brother

Social science departments, both nationally and internationally, market boundless career destinations for their graduates but fail to identify the pathways to these lucrative destinations, and appear oblivious to the social forces that threaten their existence, such as the discerning parent's investment in their offspring's education and

mounting individual student debt. This book responds to these social forces, drawing on Michael Burawoy's model of Public Sociology to show how a research-centred experiential internship provides opportunities for students to draw on their prior learning and realise their potential to create pathways towards employment. The author demonstrates how a specific, research-based course leading to employment with a non-government organisation or government department was evaluated and incrementally developed, giving voice to its multiple beneficiaries. Designed for university teachers, this book will appeal to those in social science departments who are using an internship, service learning or capstone model for their senior undergraduate classes.

He Loves Me, He Loves Me Not

This is the story that Disney would never tell you. What do you do when everything in your life falls apart? If you're Chris Mitchell, you run away from home--all the way to Disney World, a place where no one ever dies--and employees, known as Cast Members, aren't allowed to frown. Mitchell shares the behind-the-scenes story of his year in the Mouse's army. From his own personal Disneyfication, to what really happens in the hidden tunnels beneath the Magic Kingdom and what not to eat at the Mousketeria, it was a year filled with more adventure--and surprises--than he could ever have "imagineered." Funny and moving, Mitchell tracks his ascent through the backstage social hierarchy in which princesses rule, and his escapades in the "Ghetto" where Cast Members live and anything goes. Along the way, he unmasks the misfits and drop-outs, lifers and nomads who leave their demons at the stage door as they preserve the magic that draws millions to this famed fantasyland--the same magic that Mitchell seeks and ultimately finds in the last place he ever expected. Chris Mitchell is an action sports photographer and journalist who grew up in Los Angeles. He was a senior at UCLA when he started his first magazine, an inline skating publication, and sold it to Sports & Fitness Publishing. Within a few years, he was working on five magazines within The Surfer Group. He continues to work closely with a number of publications and websites, as well as event and TV production companies like ESPN, ASA Entertainment and Lifelounge. He is a recognized expert in action sports, and as such, has stunt coordinated dozens of productions, including Batman and Robin, Brink! and Airborne. He is also the Chairman of the International Inline Stunt Federation for the advancement of extreme skating as a healthy and safe activity. After spending a year working as a photographer at Disney World in Orlando, Florida, he moved back to Los Angeles, where he currently lives.

Cinderella: The Great Mouse Mistake

A Mousetrap for Darwin

Inventing a Better Mousetrap

Dan Billany's The Trap, first published in 1950, still stands - in the opinion of M.R.D. Foot - as 'one of the most powerful English novels to come out of the [Second World War].' It echoes the wartime experiences of its author, who is believed to have died in 1943 while on the run from an Italian POW camp, but not before entrusting the manuscripts of The Trap to safekeeping. The book's narrator, army lieutenant Michael Carr, tells of his early years in Cornwall, of the girl he met and loved there, and of the hard times her family endured between the wars. These troubles and joys give way to the tragedy of war, and the book's narrative becomes one of comradeship, suspense and fighting in the North African desert. 'The Trap is an outstanding novel by a writer of natural genius written with great force and honesty profoundly impressive.' Times Literary Supplement

*Instant New York Times bestseller "Howard Zinn on acid or some bullsh*t like that." —Tim Heidecker The creators of the cult-hit podcast Chapo Trap House deliver a manifesto for everyone who feels orphaned and alienated—politically, culturally, and economically—by the lanyard-wearing Wall Street centrism of the left and the lizard-brained atavism of the right: there is a better way, the Chapo Way.
