Cymbeline Once upon a time pottery schools saw an increase in enrolments whenever the film Ghost aired on television. Today it is all year round. Not since the 1970s has there been this level of interest and appreciation for pottery and ceramics. The return to the handmade has been driven by our increasingly digital lives and there are now more makers, sellers and collectors than ever. There is also a new desire for unique objects made by hand and the imperfections associated with the marks of the maker. Pottery is the vehicle that most aptly captures this authenticity. From decorative pieces to the primarily functional to sculptural works pushing the boundaries of the medium, Clay surveys the richly creative output of over 50 studio potters from around the world. It is a celebration of a new generation of artisans working in clay, a snapshot not necessarily of what is happening at elite gallery level, but rather a behind-the-scenes look at the unique and eclectic offerings from small studios around the world.

Technics and Civilization **THE TRUE STORY BEHIND NEW ITV DRAMA WHITE HOUSE FARM** 'An extraordinary book . . . both deeply moving and quietly inspiring' FREDDIE FOX

'A beautiful, very moving book' CRESSIDA BONAS In 1985, the shocking murder of a family of five in a quiet country house in Essex rocked the nation. The victims were Nevill and June Bamber; their adopted daughter Sheila Caffell, divorced from her husband Colin; and Sheila and Colin's twin sons, Nicholas and Daniel. Only one survivor remained: the Bamber's other adopted child, Jeremy Bamber. Following his lead, the police - and later the press - blamed the murders on Sheila, who, so the story went, then committed suicide. Written by Sheila's ex-husband Colin and originally published in 1994, In Search of the Rainbow's End is the first and only book about the White House Farm murders to have been written by a family member. It is the inside story of two families into whose midst the most monstrous events erupted. When Jeremy Bamber is later convicted on all five counts of murder, Colin is left to pick up the pieces of his life after not only burying his ex-wife, two children and parents-in-law, but also having to cope with memories of Sheila almost shattered by a predatory press hungry for stories of sex, drugs and the high life. Colin's tale is not just a rare insider's picture of murder, but testimony to the strength and resilience of one man in search of healing after trauma: he describes his process of recovery, a process that led to his working in prisons, helping to rehabilitate,among others, convicted murderers. By turns emotive, terrifying, and inspiring, Colin Caffell's account of mass murder and its aftermath will not fail to move and astonish.

Bootleg! The Rise And Fall Of The Secret Recording Industry In this dramatic adaptation of her award-winning, bestselling memoir, Joan Didion transforms the story of the sudden and unexpected loss of her husband and their only daughter into a stunning and powerful one-woman play. "This happened on December 30, 2003. That may seem a while ago but it won't when it happens to you . . ." Michiko Kakutani in The New York Times called the memoir that was the basis for the play, "an indelible portrait of loss and grief . . . a haunting portrait of a four-decade-long marriage." The first theatrical production of The Year of Magical Thinking opened at the Booth Theatre on March 29, 2007, starring Vanessa Redgrave and directed by David Hare.

In Search of the Rainbow's End The Gutenberg Galaxy catapulted Marshall McLuhan to fame as a media theorist and, in time, a new media prognosticator. Fifty years after its initial publication, this landmark text is more significant than ever before. Readers will be amazed by McLuhan's prescience, unmatched by anyone since, predicting as he did the dramatic technological innovations that have fundamentally changed how we communicate. The Gutenberg Galaxy foresaw the networked, compressed 'global village' that would emerge in the late-twentieth and twenty-first centuries — despite having been written when black-and-white television was ubiquitous. This new edition of The Gutenberg Galaxy celebrates both the centennial of McLuhan's birth and the fifty-year anniversary of the book's publication. A new interior design updates The Gutenberg Galaxy for twenty-first-century readers, while honouring the innovative, avant-garde spirit of the original. This edition also includes new introductory essays that illuminate McLuhan's lasting effect on a variety of scholarly fields and popular culture. A must-read for those who inhabit today's global village, The Gutenberg Galaxy is an indispensable road map for our evolving communication landscape.

Catalog of Copyright Entries. Third Series When first published, Marshall McLuhan's Understanding Media made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Hi-Lux Prado In this broad-reaching, multi-disciplinary collection, leading scholars investigate how the digital medium has altered the way we read and write text. In doing so, it challenges the very notion of scholarship as it has traditionally been imagined. Incorporating scientific, socio-historical, materialist and theoretical approaches, this rich body of work explores topics ranging from how computers have affected our relationship to language, whether the book has become an obsolete object, the nature of online journalism, and the psychology of authorship. The essays offer a significant contribution to the growing debate on how digitization is shaping our collective identity, for better or worse. Text and Genre in Reconstruction will appeal to scholars in both the humanities and sciences and provides essential reading for anyone interested in the changing relationship between reader and text in the digital age.

Ulysses In October 1928 Virginia Woolf was asked to deliver speeches at Newnham and Girton Colleges on the subject of 'Women and Fiction'; she spoke about her conviction that 'a woman must have money and a room of her own if she is to write fiction'. The following year, the two speeches were published as A Room of One's Own, and became one of the foremost feminist texts. Knitted into a polished argument are several threads of great importance – women and learning, writing and poverty – which helped to establish much of feminist thought on the importance of education and money for women's independence. In the same breath, Woolf brushes aside critics and sends out a call for solidarity and independence – a call which sent ripples well into the next century. 'Brilliant interweaving of personal experience, imaginative musing and political clarity' — Kate Mosse, The Guardian 'Probably the most influential piece of non-fictional writing by a woman in this century.' — Hermione Lee, The Financial Times

The Year of Magical Thinking: The Play

Nissan Pick-ups A new edition of Shakespeare's late romantic tragicomedy, Cymbeline.

Books and Pamphlets, Including Serials and Contributions to Periodicals Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. "The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written."—Journal of Technology and Culture

Il Decameron 'Ulysses' is a novel by Irish writer James Joyce. It was first serialised in parts in the American journal 'The Little Review' from March 1918 to December 1920, and then published in its entirety by Sylvia Beach in February 1922, in Paris. 'Ulysses' has survived bowdlerization, legal action and bitter controversy. Capturing a single day in the life of Dubliner Leopold Bloom, his friends Buck Mulligan and Stephen Dedalus, his wife Molly, and a scintillating cast of supporting characters, Joyce pushes Celtic lyricism and vulgarity to splendid extremes. An undisputed modernist classic, its ceaseless verbal inventiveness and astonishingly wide-ranging allusions confirm its standing as an imperishable monument to the human condition. It takes readers into the inner realms of human consciousness using the interior monologue style that came to be called stream of consciousness. In addition to this psychological characteristic, it gives a realistic portrait of the life of ordinary people living in Dublin, Ireland, on June 16, 1904. The novel was the subject of a famous obscenity trial in 1933, but was found by a U.S. district court in New York to be a work of art. The furor over the novel made Joyce a celebrity. In the long run, the work placed him at the forefront of the modern period of the early 1900s when literary works, primarily in the first two decades, explored interior lives and subjective reality in a new idiom, attempting to probe the human psyche in order to understand the human condition. This richly-allusive novel, revolutionary in its modernistic experimentalism, was hailed as a work of genius by W.B. Yeats, T.S. Eliot and Ernest Hemingway. Scandalously frank, wittily erudite, mercurially eloquent, resourcefully comic and generously humane, 'Ulysses' offers the reader a life-changing

experience. Publisher : General Press

Catalog of Copyright Entries Lists and catalogues have been en vogue in philosophy, cultural, media and literary studies for more than a decade. These explorations of enumerative modes, however, have not yet had the impact on classical scholarship that they deserve. While they routinely take (a limited set of) ancient models as their starting point, there is no comparably comprehensive study that focuses on antiquity; conversely, studies on lists and catalogues in Classics remain largely limited to individual texts, and – with some notable exceptions – offer little in terms of explicit theorising. The present volume is an attempt to close this gap and foster the dialogue between the recent theoretical re-appraisal of enumerative modes and scholarship on ancient cultures. The 16 contributions to the volume juxtapose literary forms of enumeration with an abundance of ancient non-, sub- or para-literary practices of listing and cataloguing. In their different approaches to this vast and heterogenous corpus, they offer a sense of the hermeneutic, epistemic and methodological challenges with which the study of enumeration is faced, and elucidate how pragmatics, materiality, performativity and aesthetics are mediated in lists and catalogues.
