This is the fifth book of The Slavic Way series. It introduces the reader to Slavic symbols, their meaning and uses in everyday life. Much of Slavic heritage has been lost over the years and with Christening of Rus', this book is a small attempt to revive and bring into the light little of that which has been lost.

You're stuck in the airport security line, late for a flight. The line isn't moving. You're angry at the security personnel for taking so long, you're irritated at the other passengers for having so much stuff, you're mad at your boss for sending you on this trip in the first place. By the time you get to your gate you're angry, deflated, and exhausted. Then someone cuts in front of you in the line to board and you snap. "There's a line, you know!" Is that really you, standing in an airport, yelling at a stranger, emotions raging? It happens to most of us more than we'd like to admit. In an instant, our lives seem out of control and overwhelming. It's always something, isn't it? But what if you could approach every part of your life—from the smallest decisions to life's biggest setbacks—with total confidence, clarity, and control? According to Sakyong Mipham, we all have that power. The secret is simple: If you just stop thinking about yourself all the time, happiness and confidence will come naturally. It sounds absurd and, what's more, impossible. But in Ruling Your World, Sakyong Mipham shares ancient secrets on how to take control of our lives and be successful while cultivating compassion for others and confidence in our own intelligence and goodness. The key to this well-being lies in the ancient strategies of the warrior kings and queens of Shambhala. The kingdom of Shambhala was an enlightened kingdom of benevolent kings and queens and fiercely trained warriors. No one knows for sure whether this kingdom was real or mythical, but there are ancient guidebooks to this land and practical instructions for creating a Shambhala in your own world, bringing peace, purpose, and perspective into your life and environment. Sakyong Mipham, the descendant of a warrior king, has inherited these teachings and gives us the lessons and myths of the great rulers and warriors of Shambhala. He makes these teachings relevant to our twenty-first-century lives in a fresh and witty voice and helps us all to realize our potential for power and control in a seemingly uncontrollable world. For the first time ever, revered spiritual leader Sakyong Mipham brings the lessons of the ancient Shambhala warriors and rulers to the Western world and shows us how to live our lives with confidence. Most of us are living in a haze—sometimes helping others, sometimes helping ourselves, sometimes happy, sometimes sad. We don't feel in control of our own lives. The ancient teachings of Shambhala rulership show us that we all have the ability to rule our own world and live with confidence. To do this, we need to use our daily lives to be strong, as opposed to aggressive, and to act with wisdom and compassion. This may sound difficult, but when we begin to mix this ancient wisdom of rulership into our everyday life, we have both spiritual and worldly success.

We don't need to abandon our life and become an ascetic or a monk in order to gain confidence and achieve this success. We can live in the world as a ruler no matter what we are doing. —from *Ruling Your World*

The P-NP problem is the most important open problem in computer science, if not all of mathematics. Simply stated, it asks whether every problem whose solution can be quickly checked by computer can also be quickly solved by computer. The *Golden Ticket* provides a nontechnical introduction to P-NP, its rich history, and its algorithmic implications for everything we do with computers and beyond. Lance Fortnow traces the history and development of P-NP, giving examples from a variety of disciplines, including economics, physics, and biology. He explores problems that capture the full difficulty of the P-NP dilemma, from discovering the shortest route through all the rides at Disney World to finding large groups of friends on Facebook. The *Golden Ticket* explores what we truly can and cannot achieve computationally, describing the benefits and unexpected challenges of this compelling problem.

About the Book: This book is an attempt to consolidate the basic scientific studies in the machining area so that fundamental mechanics and other concepts related to primary machining processes could be understood. The book is essentially designed for senior undergraduate mechanical and production engineering students but practicing engineers will also find it useful for tool and product design. The topics covered include plastic deformation, chip formation, tool geometry, mechanics of orthogonal and oblique cutting, measurement of cutting force, cutting temperature, tool wear and tool life, economics of machining, grinding of metals and machining vibrations. The analyses presented have been illustrated through numerical examples. Review questions and bibliography are also included. About the Author: Dr. G.K. Lal has been associated with the Indian Institute of Technology, Kanpur for the past 34 years. He retired as a Professor of Mechanical Engineering in 2003 and had earlier held the positions of Dean (1976-80) and Deputy Director (1982-88). Before joining IIT Kanpur he had taught at the Banaras Hindu University and held research positions at the University of Sherbrooke (Canada) and the Carnegie-Mellon University (USA). He also worked as a Design Engineer with the Abitibi Paper and Power Corp. of Canada.

Traces the decade-long dating foibles of a vintage clothing enthusiast and a brilliant jazz musician who endure bad dates, magical birthdays and multiple restarts before their friends orchestrate their meeting.

Have you ever pondered the fascinating numeric precision woven throughout the Word of God? \* 666 pertains to Antichrist. What about 777 or 888? \* Why TEN Commandments and not 14 or 18? \* Why a 7-day week? Why not 8 or 9? \* Why were there 12 tribes of Israel and 12 apostles? In this fascinating reference, the late Dr. Ed Vallowe examines the significance of every number mentioned in the Bible.

After her modeling career is destroyed by her conniving and greedy manager boyfriend, Alyssa boards a plane to Montana on which she's upgraded to first class and finds unexpected romance with her seatmate, a mysterious stranger who also has a painful past. From the creators of *GOSSIP GIRL* comes a fresh, edgy take on teenage romance. Three interconnected stories explore the different stages of love over the course of one summer on the seashore. It's summer. It's hot. And it's time to hook up. Cousins Ella, Beth, and Jamie are at their family's beach house, and they're gearing up for the wildest time of their lives. Sassy Ella is majorly crushing on a cute older boy -- who just happens to be her sister's new boyfriend. Meanwhile, practical Beth is surprised when she finds herself falling for her best friend George. And shy, creative Jamie gets her heart broken when her summer love abandons her. Three girls, too many boys, and some seriously stormy romances it all adds up to one unforgettable summer.

A new collection of philosophical biographies of key figures in Black Southern American social and political thought Frederick Douglass, Booker Washington and Ida Wells. Thurgood Marshall and Martin King are focused upon, together with Howard Thurman, Richard Wright, Fred Gray and Barbara Jordan. All are important in various ways to the movements this book seeks out. From the perspective of liberation, the two high points in the African-American Odyssey are marked by Emancipation in the nineteenth century and Desegregation in the twentieth. Douglass bestriding the first, King and Marshall the second. The thread of resistance runs through most of these philosophical profiles, and the thread of non-violence, with greater or less force, also runs throughout. This volume assumes a distinction between (a) an earlier period when Afro-America was more cohesive and collectively committed to self-improvement despite the odds, and (b) the contemporary period, beyond desegregation, marked by rates never previously rivaled of suicide, joblessness, imprisonment, despair and alienation, especially among black poor. The life stories and philosophies presented here make fascinating reading. This book is a Special Issue of the leading journal, *Critical Review of International Social and Political Philosophy*.

Robert Fortune was a Scottish gardener, botanist, plant hunter - and industrial spy. In 1848, the East India Company engaged him to make a clandestine trip into the interior of China - territory forbidden to foreigners - to steal the closely guarded secrets of tea. For centuries, China had been the world's sole tea manufacturer. Britain purchased this fuel for its Empire by trading opium to the Chinese - a poisonous relationship Britain fought two destructive wars to sustain. The East India Company had profited lavishly as the middleman, but now it was sinking, having lost its monopoly to trade tea. Its salvation, it thought, was to establish its own plantations in the Himalayas of British India. There were just two problems: India had no tea plants worth growing, and the company wouldn't have known what to do with them if it had. Hence Robert Fortune's daring trip. The Chinese interior was off-limits and virtually unknown to the West, but that's where the finest tea was grown - the richest oolongs, soochongs and pekoes. And the Emperor aimed to keep it that way.
