Aug 23, 2017 · Although the cytokine responses to repeated CWI showed no change in resting tumour necrosis factor- α , interleukin (IL)-6 and IL-1 β in volunteers, provocation by lipopolysaccharide stimulation resulted in reduced IL-6 after repeated CWI (Dugué & Leppänen, 2000). However, the cytokine response must be treated with caution, because the

For nontraumatic neck pain, Carroll et al 25 reported that between 50% and 85% of people who experience neck pain will report neck pain 1 to 5 years later, but it is unclear whether this is persistence of the initiating event, recurrence following a refractory period, or new-onset neck pain. Older age was a consistent but not strong predictor
