Rajasthan Public Service Commission is the premier commission of the government of Rajasthan, for organizing recruitment exams, procedures for recruiting employees, officers to various departments of the government. Rajasthan Public Service Commission Ajmer RPSC offers recruitment for Post of RPSC Food Safety Officer (FSO).

The State of Uttarakhand came into existence on 09 th November, 2000 under the Reorganisation of Uttar Pradesh Act 2000. The Uttarakhand Public Service Commission was Constituted under the provisions of the Article 315 of the Constitution of India by the Governor of Uttarakhand. The Commission came into existence on 15 May, 2001. The sanctioned strength of the Commission is the Chairman & the Six Members. Uttarakhand PSC is going to recruit the eligible candidates for the post of Assistant Conservator of Forest. The academic qualification for the UKPSC Assistant Conservator of Forest Post is Degree in Science, Technology or Engineering from a recognized university or board. Selection process will be conducted in three different phases: Written exam (pre & mains), Interview and Physical test.

A classic resource that has helped nurses pass the NCLEX exam for over 60 years, Mosby's Comprehensive Review of Nursing for the NCLEX-RN® Examination, 20th Edition is fully updated to reflect the newest NCLEX-RN test plan. Content review is presented in a concise and full-color outline format organized by the core areas of medical-surgical, pediatric, maternity/women's health, and mental health nursing, with a practice test following each unit. More than 4,200 practice questions and rationales -- including more than 600 questions in the newest alternate item formats -- are written by a team of trusted NCLEX experts led by author Patricia M. Nugent. This title includes additional digital media when purchased in print format. For this digital book edition, media content may not be included.

This book discusses Public-Private Partnerships (PPPs) and their potential to protect and maintain critical infrastructure in a variety of global governmental settings. Critical infrastructure is defined as essential services that underpin and support the backbone of a nation's economy, security, and health. These services include the power used by homes and businesses, drinking water, transportation, stores and shops, and communications. As governmental budgets dwindle, the maintenance of critical infrastructure and the delivery of its related services are often strained. PPPs have the potential to fill the void between government accounting and capital budgeting. This volume provides a survey of PPPs in critical infrastructure, combining theory and case studies to provide a comprehensive view of possible applications. Written by a diverse group of international experts, the chapters detail PPPs across industries such as transportation, social infrastructure, healthcare, emergency services, and water across municipalities from the US to New Zealand to Hong Kong. Chapters discuss objectives and legal requirements associated with PPPs, the potential advantages and limitations of PPPs, and provide guidance as to how to structure a successful PPP for infrastructure investment. This book is of interest to researchers studying public administration, public finance, and infrastructure as well as practitioners and decision makers interested in instituting PPPs in their communities.

There is widespread acceptance of the importance of infrastructure, but less agreement about how it should be funded and procured. While most public infrastructure is still provided in-house or by traditional procurement methods – with well-researched strengths and weaknesses – the development of service concession arrangements has seen a greater emphasis on lifecycle costing, risk assessment and asset design as featured in a variety of public private partnership (PPP) delivery models. This book examines the various procurement approaches, and provides a framework for comparing their advantages and disadvantages. Drawing on international experience, it considers some of the best and worst examples of PPPs, and infrastructure projects generally, along with the lessons for improving infrastructure procurement processes.

Slowly, silently, now the moon
Walks the night in her silver shoon;
This way, and that, she peers,
and sees Silver fruit upon silver trees;
One spring evening, the fairies gather
in the woods. Two sleepy children
join in the parade to a wonderful,
dream-like fairy party. Illustrated
by bright new talent, Carolina Rabei,
this Walter de la Mare poem is
brought to life with shimmering,
ethereal illustrations, making it
the perfect book for bedtime.
One of four seasonal Walter de la
Mare picture books that form a set,
each with complementing colour
palates and illustrations by rising
young star Carolina.

Ulcerative colitis (UC) is a chronic inflammatory disease that affects the colon. According to the literature, some thirty percent of UC patients may require a subtotal colectomy and ileostomy due to failure of medical treatment, acute toxic colitis or dysplasia/cancer diagnosis. Some patients choose to get continence restored with either an ileorectal anastomosis (IRA) or an ileal pouch-anal anastomosis (IPAA). Worldwide most surgeons prefer an IPAA to an IRA, despite reports of pouchitis, impaired fertility and fecundity. Fear of recurring proctitis and fear of rectal cancer in the remaining rectum is contributing to the choice of an IPAA. Little is known regarding the outcomes of IRA compared with IPAA in UC patients. We aimed to investigate the anorectal function, quality of life (QoL), risk of failure and rectal cancer in patients with UC restored with IRA and IPAA respectively. Methods: Data about all Inflammatory bowel disease (IBD) patients was obtained from the Swedish National Patient Register (NPR) between 1964-2014 and in one study from the Linköping University Hospital medical records 2006-2012. Patients who developed cancer were identified from the Swedish National Cancer Register. We investigated the risk of cancer and inflammation, functional outcome and failure as well as the quality of life for IRA and IPAA patients. Investigation of risk for cancer in IRA and IPAA compared with the background population was performed using survival analytic techniques: uni- and multivariate regression, Kaplan Meier curves and standardized incidence ratio. Results: Twelve percent (7,889 /63,795) of UC patients required colectomy according to the NPR. The relative risk for rectal cancer among patients with an IRA was increased (SIR 8.7). However, the absolute risk was 1.8% after a mean follow up of 8.6 years and the cumulative risk 10- and 20-years after IRA was 1.6% and 5.6%, respectively. Risk factors for rectal cancer were primary sclerosing cholangitis in patients with an IRA (hazard ratio 6.12), and severe dysplasia or cancer of the colon prior to subtotal colectomy in patients with a diverted rectum in place (hazard ratio 3.67). Regarding IPAA, the relative risk to develop rectal cancer was (SIR 0.4) compared with the background population and the absolute risk was only 0.06% after a mean of 12.2 years of follow up. Among patients operated at the Linköping University Hospital: IRA patients reported better overall continence according to the Öresland score with in median 3 (IQR 2–5) for IRA (n=38) and 10 (IQR 5–15) for IPAA (n=39, p
