Oct 13, 2021 · Samsung Refrigerator Problems; Why Does My Samsung Dryer Heating Element Keep Going Out? If your Samsung dryer's heating element keeps going out, there may be a few different reasons why this is happening. There can be an issue with the thermostat, there could be a loose connection in the power cord, or it could be that something is wrong

Note: Even if your dryer passes the test, you should still clean your exhaust vent once or twice a year. If you used your dryer prior to starting the test, it may not enter the test mode; your dryer must be sufficiently cooled down first. If you're running the test right after installing your dryer, you can run the AIR FLUFF cycle for several minutes to reduce the internal temperature.

Samsung dryer not heating. The dryer is the necessary need for both season summer and winter. Everyone want to dry the clothes in a dryer within a little time. Sometimes bad elements are stuck in the spinner its stops heating and also stops dry the clothes.

If your condenser tumble dryer is not drying clothes, it's possible for lint to fall down into the condenser, where it gets wet and possibly stuck. Over time, this can build up and cause the air to stop flowing through it. To check if this is the case, take the condenser assembly out of the dryer and have a look inside for any lint build-up.

In this case, your Samsung dryer has a thermal cut-off fuse at the heater assembly that protects against overheating.. If temperatures rise too high, the thermal cut-

# Online Library Samsung Dryer Problems

off fuse will burn out and prevent the dryer from heating up. Why it fails: When a Samsung dryer isn't heating up, there's a 10% chance that it's because of a burnt thermal cut-off fuse in the heater assembly.
