**Set (mathematics) - Wikipedia I use Schaum for younger students 7-9 yrs old. Older than that I just start with either the Schaum Book A or the John Thompson 1st Grade book. Both are good and have their own advantages. Schaum is a little easier to use, Thompson better for really bright students as it tends to be a little harder and moves forward faster.**

**Register at FaaDoOEngineers.com In mathematics, a set is a collection of elements. The elements that make up a set can be any kind of mathematical objects: numbers, symbols, points in space, lines, other geometrical shapes, variables, or even other sets. The set with no element is the empty set; a set with a single element is a singleton. A set may have a finite number of elements or be an infinite set.**
