Draws together a wealth of knowledge from a varied list of contributors all of whom recognise the importance of promoting equality in primary schools.

Produced in response to market demand, this text provides challenging work in preparation for examinations, especially 11+ and Common Entrance. It is targeted at high achievers in Year 6 (ages 10-11).

It is suitable to - Children with strong self-learning ability - Parents who train their children on their own - Kindergarten or Primary school teacher - Students majoring in early childhood education or elementary education in universities and colleges - Those who are interested in becoming an abacus and mental arithmetic teacher or are interested in running an abacus and mental arithmetic class

To Develop Logical Thinking In Students The Subject Matter Is Presented In A Logical Step-By-Step Method, Using Very Simple Language And A Large Number Of Illustrative Examples. The Treatment In The Books Consists Of First Establishing A Concept, Followed By Simple Objective Type Solved And Unsolved Questions To Cement The Concept And Build Confidence. This Is Followed By Progressively More Difficult Solved And Unsolved Exercises In Sufficient Numbers To Cover All Points In The Chapter. Each Exercise Consists Of Objective Type Questions Of 1 Mark, Short Answer Questions Of 2 Marks, Long Answer Questions Of 3 Or 4 Marks, And Very Long Answer Questions Of 5 Or 6 Marks. Questions Asked In Various Examinations Have Been Included In The Solved Problems And Exercises. At The End Of Each Book 5 Unsolved Test Papers Are Given Following The Pattern Of The Cbse Examinations.

Brand new for 2016 Following on from Practice Papers 1, these papers further test pupils in preparation for the most challenging of pre-tests and 11+ independent school entrance exams including CEM, GL and ISEB. Four levelled exam papers with a total of 260 questions are included, to test ability across all mathematical topics. These papers include - one in the style of a longer-format GL bespoke test in standard question format - three further longer-format tests with challenging content, speed and question variation to support all 11+ tests. The papers will develop and perfect exam technique, and will teach pupils to improve their response rates with timed papers. Pupils will - become familiar with the way long-format 11+ tests are presented - build exam-room confidence by practising with a variety of exam paper styles - work with the most challenging question set - build up speed in answering questions to the timing expected in the most demanding tests The brand new 11+ and pre-test range has been constructed to help pupils follow a three step revision journey .. Learning to teach involves hard work and careful preparation. To become an effective teacher requires pedagogical and subject knowledge, an understanding of your pupils and how they learn, and the confidence to respond to dynamic classroom situations. Learning to Teach in the Secondary School is the market leading text for all undergraduate, postgraduate and school-based routes to qualified teacher status. It offers an in-depth and practical introduction to the knowledge, skills and understanding needed to become a confident and effective teacher. With a focus on evidence-based practice, the book includes a wealth of examples to demonstrate how to successfully apply theory to practice, and how to critically analyse your practice to maximise pupil learning. This 7th edition is fully updated in light of the latest initiatives, evidence and research in the field, offering comprehensive coverage, unit by unit, of the key concepts and skills addressed on initial teacher education courses in preparation for work in schools. The wide range of pedagogical features support both university based work - including that up to Masters Level - and school-based initial teacher education, and are designed to help you develop those qualities that lead to good practice and a successful future in education. Written by expert practitioners, thirty-six essential units include: • adopting a positive approach to managing behaviour to support learning • ways pupils learn • planning lessons, units of work and schemes of work • motivating pupils • assessment • inclusion and special educational needs • using ICT and digital technologies • pupil grouping, progression and differentiation • managing time, workload and stress • getting your first teaching post. Learning to Teach in the Secondary School provides practical help and guidance for many of the situations and potential challenges you are faced with in school. Supported by the Learning to Teach Subjects in the Secondary School Series, it is an essential purchase for every aspiring secondary school teacher.

This text examines the enormous pressure placed on University students in Japan, Korea and Taiwan which have led to the rapid expansion of the "cramming" industry and to a growing number of students looking to religion and spirituality for guidance. The book examines the issue of the rise in youth suicides, and the dramatic rise in levels of cheating; both raising fundamental questions about the education system in the late 1990s.

Book Type - Practice Sets / Solved Papers About Exam- The exam is divided into 2 levels or papers. Paper I is for candidates who wish to teach classes 1 to 5 and Paper II is for candidates who wish to teach classes 6 to 8. In case candidates wish to qualify to teach classes 1 - 8, they can appear for both papers in CTET. Exam pattern Both Paper I & II contain a total of 150 multiple-choice questions (MCQs) each. 1 mark is awarded to correct answers and there is no negative marking for incorrect answers. Paper 1 consists of 5 sections namely Child Development and Pedagogy, Language I (compulsory), Language II (compulsory), Mathematics, Environmental Studies while Paper 2 consists of 4 sections namely Child Development and Pedagogy, Language I (compulsory), Language II (compulsory), Mathematics. Candidates have to choose between Mathematics & Science and Social Studies in Paper 2. Duration of Paper 1 is 2.5 hours (150 minutes) and for Paper 2 is 2.5 hours (150 minutes) Negative Marking - NO Exam Level - National Level Conducting Body - Central Board of Secondary Education (CBSE).

Suitable for high school students with high mathematics ability and people above high school level. High school students with higher mathematics ability should learn more in-depth Mathematical Olympiad topics through independent

learning methods to further improve their mathematics level, which is conducive to studying university subjects in the future.

It is suitable to - Children with strong self-learning ability - Parents who train their children on their own - Kindergarten or Primary school teacher - Students majoring in early childhood education or elementary education in universities and colleges - Those who are interested in becoming an abacus and mental arithmetic teacher or are interested in running an abacus and mental arithmetic class

This comprehensive study guide offers coverage of all five modules in the HSC english course.

At a time when political interest in mathematics education is at its highest, this book demonstrates that the issues are far from straightforward. A wide range of international contributors address such questions as: What is mathematics, and what is it for? What skills does mathematics education need to provide as technology advances? What are the implications for teacher education? What can we learn from past attempts to change the mathematics curriculum? Rethinking the Mathematics Curriculum offers stimulating discussions, showing much is to be learnt from the differences in culture, national expectations, and political restraints revealed in the book. This accessible book will be of particular interest to policy makers, curriculum developers, educators, researchers and employers as well as the general reader.
