WALL STREET JOURNAL BESTSELLER! IF YOU'RE IN SALES, FEAR HAS COST YOU MILLIONS OF DOLLARS, AND THIS BOOK IS FOR YOU. Fear is the reason most salespeople don't like to pick up the phone (salespeople average just four hours per week on the phone, and our job is to talk to humans!). Fear is the reason we don't ask for the business more, even though our customers want to buy from us. Fear is the reason we don't offer our customers additional products and services, even though they would love to buy more from us. This book deals with that fear. You will learn exactly how to overcome this destructive fear in sales, and replace it with confidence, optimism, gratitude, joy, and proactive sales work. These are the powerful principles in the new field of positive psychology which are transforming how we work and succeed. **Selling Boldly** is the first book that leverages positive psychology to help you sell more. You'll also learn a series of fast, simple sales-growth techniques—like how to add on to existing orders; and how to close 20% more quotes and proposals instantly; and how to properly ask for and receive referrals—that will grow your sales dramatically and quickly. Alex Goldfayn's clients grow their sales by 10-20% annually, every year, as long as they apply his simple approaches. **YOU ALREADY KNOW WHAT TO DO** I am not going to teach you much in this book that you don't already know. You're a professional salesperson. You do this for a living. You know, for example, that testimonials and referrals are among the best ways we have to grow sales, right? But do you ask for them enough? Most people don't. You know that calling a customer on the phone is more effective than emailing her, but you still often revert to email. You know your customers buy other products and services that you can help them with, but you don't ask them about these products. You'd like to help them, and they would like more of your help – that is why they've been with you for five or ten or twenty years – but nevertheless we don't ask them. There is a difference between knowing what to do, and actually doing it. I know you know. With **Selling Boldly**, we start to do what we already know. We will cover what keeps us from doing these things (fear), how to overcome it (by listening to your happy customers), and how to implement these simple but powerful sales growth techniques (by briefly planning them, also doing them). Because sales growth comes from doing, not knowing. Today, we start doing. And growing. These approaches are laid out in this book, in precise detail, for you to implement in your own work. Alex doesn't hold anything back in this manual for selling more. What's the secret to selling more? There is no secret. There is no magic bullet. There is only the work. There are only the mindsets, and the communications. In **Selling Boldly**, Alex teaches readers how to attain these mindsets, and how to implement these communications, so that sales have no choice but to grow!

Jordan Belfort—immortalized by Leonardo DiCaprio in the hit movie *The Wolf of Wall Street*—reveals the step-by-step sales and persuasion system proven to turn anyone into a sales-closing, money-earning rock star. For the first time ever, Jordan Belfort opens his playbook and gives you access to his exclusive step-by-step system—the same system he used to create massive wealth for himself, his clients, and his sales teams. Until now this revolutionary program was only available through Jordan's \$1,997 online training. Now, in *Way of the Wolf*, Belfort is ready to unleash the power of persuasion to a whole new generation, revealing how anyone can bounce back from devastating setbacks, master the art of persuasion, and build wealth. Every technique, every strategy, and every tip has been tested and proven to work in real-life situations. Written in his own inimitable voice, *Way of the Wolf* cracks the code on how to persuade anyone to do anything, and coaches readers—regardless of age, education, or skill level—to be a master sales person, negotiator, closer, entrepreneur, or speaker.

A New York Times Bestseller, One of The Wall Street Journal's "10 Books to Read Now," and One of Kirkus Reviews's Best Nonfiction Books of Year We all sense it—something big is going on. You feel it in your workplace. You feel it when you talk to your kids. You can't miss it when you read the newspapers or watch the news. Our lives are being transformed in so many realms all at once—and it is dizzying. In *Thank You for Being Late*, version 2.0, with a new afterword, Thomas L. Friedman exposes the tectonic movements that are reshaping the world today and explains how to get the most out of them and cushion their worst impacts. His thesis: to understand the twenty-first century, you need to understand that the planet's three largest forces—Moore's law (technology), the Market (globalization), and Mother Nature (climate change and biodiversity loss)—are accelerating all at once. These accelerations are transforming five key realms: the workplace, politics, geopolitics, ethics, and community. The year 2007 was the major inflection point: the release of the iPhone, together with advances in silicon chips, software, storage, sensors, and networking, created a new technology platform that is reshaping everything from how we hail a taxi to the fate of nations to our most intimate relationships. It is providing vast new opportunities for individuals and small groups to save the world—or to destroy it. With his trademark vitality, wit, and optimism, Friedman shows that we can overcome the multiple stresses of an age of accelerations—if we slow down, if we dare to be late and use the time to reimagine work, politics, and community. *Thank You for Being Late* is an essential guide to the present and the future.

Two top business professors offer up the only negotiation book you'll ever need Do you know what you want? How can you make sure you get it? Or rather, how can you convince others to give it to you? Almost every interaction involves negotiation, yet we often miss the cues that would allow us to make the most of these exchanges. In *Getting (More of) What You Want*, Margaret Neale and Thomas Lys draw on the latest advances in psychology and behavioral economics to provide new strategies for negotiation that take into account people's irrational biases as well as their rational behaviors. Whether you're shopping for a car, lobbying for a raise, or simply haggling over who takes out the trash, *Getting (More of) What You Want* shows how negotiations regularly leave significant value on the table—and how you can claim it.

China expert Robert Spalding reveals the shocking success China has had infiltrating American institutions and compromising our national security. The media often suggest that Russia poses the greatest threat to America's national security, but the real danger lies farther east. While those in power have been distracted and disorderly, China has waged a six-front war on America's economy, military, diplomacy, technology, education, and infrastructure--and they're winning. It's almost too late to undo the shocking, though nearly invisible, victories of the Chinese. In *Stealth War*, retired Air Force Brigadier General Robert Spalding reveals China's motives and secret attacks on the West. Chronicling how our leaders have failed to protect us over recent decades, he provides shocking evidence of some of China's most brilliant ploys, including:

- Placing Confucius Institutes in universities across the United States that serve to monitor and control Chinese students on campus and spread communist narratives to unsuspecting American students.
- Offering enormous sums to American experts who create investment funds that funnel technology to China.
- Signing a thirty-year agreement with the US that allows China to share peaceful nuclear technology, ensuring that they have access to American nuclear know-how. Spalding's concern isn't merely that America could lose its position on the world stage. More urgently, the Chinese Communist Party has a fundamental loathing of the legal protections America grants its people and seeks to create a world without those rights. Despite all the damage done so far, Spalding shows how it's still possible for the U.S. and the rest of the free world to combat--and win--China's stealth war.

- Engage buyers' emotions to increase their receptiveness to you and your ideas
- Ask questions that line up with how the brain discloses information
- Lock in the incremental commitments that lead to a sale
- Create positive influence and reduce the sway of competitors
- Discover the underlying causes of objections and neutralize them
- Guide buyers through the necessary mental steps to make purchasing decisions

Here in a short, compact and concise format is the basics of how to persuade more people more effectively, more ethically, and more often. Ziglar draws from his fundamental selling experiences and shows that while the fundamentals of selling may remain constant, sales people must continue learning, living, and looking: learning from the past without living there; living in the present by seizing each vital moment of every single day; and looking to the future with hope, optimism, and education. His tips will not only keep your clients happy and add to your income, but will also teach you ideas and principles that will, most importantly, add to the quality of your life. The New Psychology of Selling The sales profession is in the midst of a perfect storm. Buyers have more power--more information, more at stake, and more control over the sales process--than any time in history. Technology is bringing disruptive change at an ever-increasing pace, creating fear and uncertainty that leaves buyers clinging to the status quo. Deteriorating attention spans have made it difficult to get buyers to sit still long enough to "challenge," "teach," "help," give "insight," or sell "value." And a relentless onslaught of "me-too" competitors have made differentiating on the attributes of products, services, or even price more difficult than ever. Legions of salespeople and their leaders are coming face to face with a cold hard truth: what once gave salespeople a competitive edge--controlling the sales process, command of product knowledge, an arsenal of technology, and a great pitch--are no longer guarantees of success. Yet this is where the vast majority of the roughly \$20 billion spent each year on sales training goes. It's no wonder many companies are seeing 50 percent or more of their salespeople miss quota. Yet, in this new paradigm, an elite group of top 1 percent sales professionals are crushing it. In our age of technology where information is ubiquitous and buyer attention spans are fleeting, these superstars have learned how to leverage a new psychology of selling--Sales EQ--to keep prospects engaged, create true competitive differentiation, as well as shape and influence buying decisions. These top earners are acutely aware that the experience of buying from them is far more important than products, prices, features, and solutions. In *Sales EQ*, Jeb Blount takes you on an unprecedented journey into the behaviors, techniques, and secrets of the highest earning salespeople in every industry and field. You'll learn: How to answer the 5 Most Important Questions in Sales to make it virtually impossible for prospects to say no How to master 7 People Principles that will give you the power to influence anyone to do almost anything How to shape and align the 3 Processes of Sales to lock out competitors and shorten the sales cycle How to Flip the Buyer Script to gain complete control of the sales conversation How to Disrupt Expectations to pull buyers towards you, direct their attention, and keep them engaged How to leverage Non-Complementary Behavior to eliminate resistance, conflict, and objections How to employ the Bridge Technique to gain the micro-commitments and next steps you need to keep your deals from stalling How to tame Irrational Buyers, shake them out of their comfort zone, and shape the decision making process How to measure and increase your own Sales EQ using the 15 Sales Specific Emotional Intelligence Markers And so much more! Sales EQ begins where The Challenger Sale, Strategic Selling, and Spin Selling leave off. It addresses the human relationship gap in the modern sales process at a time when sales organizations are failing because many salespeople have never been taught the human skills required to effectively engage buyers at the emotional level. Jeb Blount makes a compelling case that sales specific emotional intelligence (Sales EQ) is more essential to success than education, experience, industry awareness, product knowledge, skills, or raw IQ; and, sales professionals who invest in developing and improving Sales EQ gain a decisive competitive advantage in the hyper-competitive global marketplace. Sales EQ arms salespeople and sales leaders with the tools to identify their most important sales specific emotional intelligence developmental needs along with strategies, techniques, and frameworks for reaching ultra-high performance and earnings, regardless of sales process, industry, deal complexity, role (inside or outside), product or service (B2B or B2C).

Learn why selling is part of human nature-- and part of every job! Selling used to be the exclusive territory of professional salesmen who had dedicated their lives and careers to a sales-driven industry. But acclaimed author Daniel Pink argues that those days are gone! To Sell is Human (2013) outlines the cultural shift which has integrated sales as a necessary role in almost every job. Pink also expounds on this theory and identifies what he calls the "new ABCs of sales."

It isn't often that a publisher can honestly say that the book he is introducing is the best one on a particular topic that he has ever read. This is one of those rare occasions. Sales Cybernetics is the best book I've ever read on the psychology of selling.

True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

Updated with bonus material, including a new foreword and afterword with new research, this New York Times bestseller is essential reading for a time when mental health is constantly in the news. In this astonishing and startling book, award-winning science and history writer Robert Whitaker investigates a medical mystery: Why has the number of disabled mentally ill in the United States tripled over the past two decades? Interwoven with Whitaker's groundbreaking analysis of the merits of psychiatric medications are the personal stories of children and adults swept up in this epidemic. As Anatomy of an Epidemic reveals, other societies have begun to alter their use of psychiatric medications and are now reporting much improved outcomes. . . . so why can't such change happen here in the United States? Why have the results from these long-term studies--all of which point to the same startling conclusion--been kept from the public? Our nation has been hit by an epidemic of disabling mental illness, and yet, as Anatomy of an Epidemic reveals, the medical blueprints for curbing that epidemic have already been drawn up. Whitaker is at the height of his powers." --Greg Critser, author of Generation Rx

The creator of the Unmistakable Creative podcast makes a counterintuitive argument: By focusing your creative work on pleasing yourself, you can increase your productivity, happiness, and (eventually, paradoxically) the size of your audience. Creating for your own pleasure--whether you're writing a novel, composing songs, or painting a landscape--can seem pointless. It's tempting to focus on pursuing money and fame, rather than the process itself. But as Srini Rao warns, creating then turns into a chore that can harm your self-esteem and

suck the pleasure out of life, rather than being a source of joy. Rao, host of the podcast The Unmistakable Creative, argues that we should counter this thinking by intentionally creating art for ourselves alone—an audience of one. In this book he shares the fascinating true stories of creatives who took this path, along with actionable tips and the research of creativity experts. You'll learn, for example: • How Oprah's intentional focus on her own work rather than the opinions of everyone else catapulted her into one of the most popular talk shows of all time. • How being process-driven can not only help you produce more work, but can make you happier outside of your creative time. • How to put together a creative "team of rivals" whose feedback can help you hone your craft and filter out useless feedback. By playing to an audience of one, we can find more happiness, increased productivity, and a greater sense of community.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money-investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.
