for college professors who prepare pre-service teachers to work with those students. The book brings together insights from linguistic, socio-cultural, educational, cognitive, developmental perspectives of what it means for ELLs to learn both English and subject matter knowledge in English as a second language. It delineates unique challenges that ELLs experience, offers ELLs' learning stories, and suggests concrete strategies with classroom teaching examples across academic disciplines. The 2nd edition broadens the scope of the 1st edition in several aspects. Specifically, it includes two chapters about secondary ELLs' previous educational experiences in their home countries, a chapter on subject matter lesson planning with ELLs in mind with teacher collaborative strategies, and more principle-based and field-tested effective instructional and assessment strategies for working with ELLs.

This book is a cross-linguistic study of the syntax of yes-no questions and their answers, drawing on data from a wide range of languages with particular focus on English, Finnish, Swedish, Thai, and Chinese. There are broadly two types of answer to yes-no questions: those that employ particles such as 'yes' and 'no' (as found in English) and those that echo a part of the question, usually the finite verb, with or without negation (as found in Finnish). The latter are uncontroversially derived by ellipsis, while the former have been claimed to be clause substitutes. Anders Holmberg argues instead that even answers that employ particles are complete sentences, derived by ellipsis from full sentential expressions, and that the two types share essential syntactic properties. The book also examines the related cross-linguistic and intralinguistic variation observed in answers to negative questions such as 'does he not drink coffee?', whereby 'yes' in one language appears to correspond to 'no' in another. The book illustrates how a seemingly trivial phenomenon can have the most wide-ranging consequences for theories of language, and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics.

Finally! A workbook that guides you—and your family—through a positive college admission experience. College admission has always been complicated—and COVID-19 has changed the college search and selection process in profound and challenging ways. But the authors behind the best-selling The Truth about College Admission are here to help with a new college admission workbook that puts the complex process into the hands of students and those who support them. Packed with activities and exercises, it's designed to help students find multiple colleges where they can not only get in, afford to go, and thrive on campus but also enjoy the adventure along the way. From building a balanced list of schools to research and visit to writing essays, preparing for interviews, and ultimately choosing a college to attend, the interactive exercises in this comprehensive workbook provide students with important questions to ask, information to consider, and the preparation they need to help them focus more on how they ultimately arrive on a college campus rather than precisely where their journey takes them. If done right, college counselor Brennan Barnard and undergraduate admission director Rick Clark demonstrate, college admission can be more like the college experience itself—an opportunity to grow, learn, discover, enjoy, and build close, lasting relationships. A companion resource to The Truth about College Admission: A Family Guide to Getting In and Staying Together, each chapter in this guide is designed to help high school classes, small study groups, or individual students and their families focus on the most important questions to ask, steps to take, and conversations to have as they apply to college. Full of accurate information and experience-based insight, this workbook cuts out the noise and stress, instead encouraging students to reflect, research, and regain perspective.
