The illustrated classic, complete with a new preface by Matt Groening. Winner of three Academy Awards and numerous other prizes for his animated films, Chuck Jones is the director of scores of famous Warner Bros. cartoons and the creator of such memorable characters as the Road Runner, Wile E. Coyote, Pepé Le Pew, and Marvin Martian. In this beguiling memoir, Chuck Jones evokes the golden years of life at "Termite Terrace," the Warner Bros. studio in which he and his now-famous fellow animators conceived the cartoons that delighted millions of moviegoers throughout the world and entertain new generations of fans on television. Not a mere history, Chuck Amuck captures the antic spirit that created classic cartoons—such as Duck Dodgers in the 24½ Century, One Froggy Evening, Duck Amuck, and What's Opera, Doc?—with some of the wittiest insights into the art of comedy since Mark Twain.

The director of Bugs Bunny, Daffy Duck, and Road Runner cartoons discusses his childhood influences, gives advice on how to draw, and reveals how his characters were created

In 1911, famed cartoonist Winsor McCay debuted one of the first animated cartoons, based on his sophisticated newspaper strip "Little Nemo in Slumberland," itself inspired by Freud's recent research on dreams. McCay is largely forgotten today, but he unleashed an art form, and the creative energy of artists from Otto Messmer and Max Fleischer to Walt Disney and Warner Bros.' Chuck Jones. Their origin stories, rivalries, and sheer genius, as Reid Mitenbuler skillfully relates, were as colorful and subversive as their creations—from Felix the Cat to Bugs Bunny to feature films such as Fantasia—which became an integral part and reflection of American culture over the next five decades. Pre-television,

animated cartoons were aimed squarely at adults; comic preludes to movies, they were often “little hand grenades of social and political satire.” Early Betty Boop cartoons included nudity; Popeye stories contained sly references to the injustices of unchecked capitalism. “During its first half-century,” Mitenbuler writes, “animation was an important part of the culture wars about free speech, censorship, the appropriate boundaries of humor, and the influence of art and media on society.” During WWII it also played a significant role in propaganda. The Golden Age of animation ended with the advent of television, when cartoons were sanitized to appeal to children and help advertisers sell sugary breakfast cereals. Wild Minds is an ode to our colorful past and to the creative energy that later inspired The Simpsons, South Park, and BoJack Horseman.

Runner, Wile E. Coyote, and Pepé le Pew. These interviews span more than thirty years, beginning with a 1968 conversation in which Jones (1912–2002) shares the spotlight with science fiction giant Ray Bradbury. Throughout, the interviews illustrate the development of Jones's career, including shifts that came after the Warner Bros. animation unit closed in the early 1960s—from the uncertain years of American animation during that decade and the 1970s through the "rediscovery" of Jones and Hollywood studio animation during the 1980s and 1990s. Jones candidly discusses his aesthetic sensibilities, providing tips for aspiring animators and describing Warner Bros. animation in its heyday. Jones was an art college graduate who struggled through the Depression, trying to establish himself within the Hollywood industry. In these conversations he emerges as a witty raconteur and a well-read, inspiring advocate for animation art, intent on nurturing future generations of animators. Jones recalls vividly the Golden Age of studio animation from the 1930s to the 1950s, including his connections with the Walt Disney studio and United Productions of America. With pleasure, insight, and depth, he describes his family and early life as well as his post-Looney Tunes and Merrie Melodies days. These interviews reveal Jones's struggles as an artist, the many influences upon him, and the creative process that made him famous. This volume contains previously unpublished material along with classic interviews. Throughout the 70s and well into the 80s, Ron Barbagallo made Fine Art with his twin sister Lori, who passed in 1988. At that time, Ron worked as a photorealist painter while Lori explored photography in the area of Abstract Expressionist Found Object. As twins who lived and worked together, Ron consulted on all her imagery which focused on finding "art" in the streets of NJ and NYC. In 2012, Barbagallo decided to continue their dialog and founded 'the Found in Los Angeles project' where he extends that search to the sidewalks of Los Feliz, to the facades of West Hollywood, around the redefining elements of urban Downtown LA, onto the sun-soaked boardwalk of Venice and right into the swimming pools found in Hollywood Hills. Using all these facets of the city, Barbagallo creates "emotional-landscapes" by way of his photography which evoke the diverse spiral that is LA.

Ben (Bugs) Hardaway. As a teenager Sigall became an apprentice painter working in the Golden Age of Hollywood at the Leon Schlesinger studio, making \$12.75 per week coloring animation cels that would introduce Bugs Bunny and Elmer Fudd to the world. She recounts her wild and wonderful experiences with the Warner Bros. cartoon crew, working and laughing all day with the animators, partying all night with the Looney Tunes gang on the bowling and baseball teams, and participating in weekend scavenger hunts. She was president of the in-house "Looney Tunes Club," co-wrote the company gossip column, and performed in the company's theatrical troupe. As nuclear weapons become ever more sophisticated, so the deterrence debate becomes increasingly complex. The 'Ban the Bomb' slogans of the 1950s had been replaced by cries for 'nuclear-free zones',

and talk of 'megatonnage' and 'fallout' had given way to talk of 'tactical' nuclear weapons and 'limited strike capability'. Originally published in 1982, this book considers the ethical issues raised by nuclear policies and by the debate between proponents of the multilateralist/unilateralist approaches to disarmament and arms control at the time. It is not, like so many books on the subject, an ideological statement: there are essays by defence strategists which put the case for deterrence and essays by academics and churchmen which strenuously oppose it. The book also includes an essay on attempts to mitigate the appalling brutality of the many 'conventional' wars since 1945. At a time when the rhetoric and misinformation produced on both sides of the debate continued to obscure many vital issues, this book was welcome, sensible and necessary.
